*The Next Generation Master Agency*

**MICROCORP** simplifies the purchase and management of telecom services for business customers nationwide and around the world.

**MICROCORP**, with a portfolio of over 35 carrier agreements, is able to provide you with best in class solutions tailored for the needs of your business. We then provision these solutions through Nautilus™, our proprietary process management software, and empower you to integrate and audit all your services inventory within Insite™, our hosted software platform. MicroCorp delivers these solutions through one of the nation's largest distribution networks, consisting of over 1,500 Telecommunication Agents, System Integrators and VARs.

**So what makes MicroCorp different?**

## COMMISSION ASSURANCE

Based on the carrier sales you make through MicroCorp, we are the **FIRST and ONLY** Master Agency that provides you with legal ownership in your share of the commission revenue earned from our service providers. Quite simply, if we went out of business, your revenue stream is protected.

## STABILITY

Selecting a Master Agency is much like making a long-term investment. You want to make sure that your investment is not only safe, but also has great prospects for growth. Since 1986, over 1,500 telecom agents and VARs have put their trust in MicroCorp.

## PARTNERSHIP

At MicroCorp you are treated like a partner, not a sub-agent. This may seem like a simple statement, but at MicroCorp we take our partnerships very seriously. Based on the carrier sales you make through MicroCorp, we are the FIRST and ONLY Master Agency that provides you with legal ownership in your share of the commission revenue earned from our service providers. Quite simply, if we went out of business, your revenue stream is protected.

## ORDER MANAGEMENT

MicroCorp manages your orders so you can focus on other things, like building your business. But at MicroCorp, we take managing your orders to a whole new level. This is why we built Nautilus, our hosted back office management system. In fact, it has been said that we are fanatical about the management and support of your orders.

## INNOVATION

Our Innovation is focused on simplifying the management of telecom assets for you and your customers. As a direct result of MicroCorp's innovation, we help you open doors, close deals and retain customers.

## FLEXIBILITY

At MicroCorp, we work with professional telecommunication agencies of all types and sizes. In fact, some are Master Agents themselves. When you are ready to partner with MicroCorp, we will build a program that caters to your business model. As a partner, we are here to help you succeed and grow your business. We allow you to pick the support model that is right for your business, and we do not tie you down to heavy commitments or quotas. At MicroCorp, we earn your business every day; and because we do our job so well, we know we will continue to earn your business long into the future.

Insite removes the pain associated with Telecom Asset Inventory and Expense Management by leveraging the power of software with the experience of seasoned telecommunication professionals. The end result is a robust and comprehensive platform designed to deliver outstanding asset inventory and expense management solutions specifically designed for the medium to enterprise-size business.
